NEVSUN'S BISHA MINING PROJECT

Nevsun plans to start engineering design/construction at its Bisha poly metallic mine project in the gash-Barka region in 2006 followed with production planned to begin in 2008

This is a flagship project that will assist the development of a mining industry in Eritrea. it will require many skills, both in the construction and production phases, and Nevsun is taking this early opportunity to create a database of Eritrean nationals in country and abroad who wish to participate and believe that they have the appropriate qualifications, experience and abilities in the following disciplines:-

1. Mineral Processing
2. Metallurgy
3. Geology
4. Assaying
5. Open Pit Mining Engineering
6. Open Pit Mine Planning
7. Open Pit Drilling And Blasting
8. Surveying
9. Electrical Engineering
10. Mechanical Engineering
11. Civil Engineering
12. Maintenance Engineering
13. Large Mining Equipment Operators
14. Human Resource Management
15. Environmental Management
16. Information Technology
17. Administration Managers
18. Purchasing/Logistics/Warehousing/Customs
19. Accounting/Payroll
20. Safety Training Officers
21. Instrument Engineers
